

# Subject Index to Volume 11

## A

- Acetazolamide, chemoreceptor response and, carotid body, C200
- Acetylcholine
  - desensitization and, muscle (frog), C319
  - receptors, neuromuscular transmission and, C366
- Acridine orange, proton uptake, secretory granules, pancreatic  $\beta$ -cells, C382
- Active transport: *see* specific subject and site
- Adenosine monophosphate, cyclic
  - catecholamine sensitivity, brown fat cells, cold acclimation, C250
  - hexose transport, kidney cells, C94
- Adenosine triphosphatase, magnesium, calcium-stimulated, sarcoplasmic reticulum, C242
- Adenosine triphosphate
  - calcium transport and, plasma membrane, myometrium, C278
  - lysosomes and, protection from cooling, C192
  - muscle, metabolite changes during stimulation, C218
  - proton uptake, secretory granules, pancreatic  $\beta$ -cells, C382
  - sarcoplasmic reticulum function and, vascular smooth muscle, C242
- Adenylate cyclase, sodium-calcium exchange and, ischemic heart, C288
- Adipocytes
  - brown
    - catecholamine sensitivity, cold acclimation, C250
    - respiration, butyrate effects (hamster), C46
- Adipose tissue, brown: *see* Brown fat
- Agglutinin, peanut, binding, epithelial cells, kidney, C117
- L-Alanine, metabolism, LLC-PK, renal epithelia (pig), C41
- Albumin, motility and, spermatozoa, C304
- Alcohol, erythrocyte permeability, temperature effects, C74
- Amiloride
  - epithelial cell culture, thick ascending limbs, kidney, C229
  - sodium transport, tissues and cells, C131
- Amino acid, conversion, red blood cells, C393
- Antidiuretic hormones, NADH
  - fluorescence, oxygen consumption, hepatocytes, C172
- Antimycin A, chemoreceptor response and, carotid body, C200
- Aorta, adenosine triphosphate effects, sarcoplasmic reticulum, C242
- Arginine, metabolism, red blood cells, C393
- Arsenazo III, cytosolic free calcium levels and, proximal tubules, C124
- Arteries: *see* specific artery
- ATPase: *see* Adenosine triphosphatase
- ATP: *see* Adenosine triphosphate

## B

- Barium, smooth muscle contraction, arterial, C25

## Brown fat

- catecholamine sensitivity, cold acclimation and, C250
- heat production, butyrate effects (hamster), C46
- trophic response to cold, guanethidine effects, C159
- 2-*n*-Butyl-methylenedioxyindene, mechanics and energetics, skeletal muscle (frog), C347
- Butyrate, ouabain-sensitive respiration and, brown adipocytes (hamster), C46

## C

- Calcium
  - adenosine triphosphate protective action, lysosomes, C192
  - antagonist, skeletal muscle and (frog), C347
  - antagonists, smooth muscle contraction and, arterial, C25
  - cytosolic free, proximal tubules, C124
  - dependence, arterial smooth muscle (swine), C102
  - desensitization and, muscle (frog), C319
  - free, Ca-EGTA solutions, C404
  - hormone-induced changes, hepatocytes, C172
  - intracellular pools, contractile activity, smooth muscle, C36
  - permeability: *see* Permeability
  - pump: *see* Pump
  - transepithelial potential, strontium medium (monkey), C360
  - uptake
    - myometrium plasma membrane, C278
    - sarcoplasmic reticulum, C242
- Calcium ions, myosin light chain phosphorylation and, smooth muscle (swine), C109
- cAMP: *see* Adenosine monophosphate, cyclic
- Carbon dioxide, carotid body
  - chemoreceptor response to, oligomycin effects, C200
- Carbonic anhydrase, chemoreceptor response and, carotid body, C200
- Carotid artery, myosin light chain phosphorylation, vascular smooth muscle (swine), C109
- Carotid body, chemoreceptors: *see* Receptors
- Catecholamines, sensitivity, cold acclimation, brown fat cells, C250
- Cell: *see also* specific type and site
  - sodium transport, amiloride effects, C131
  - volume: *see* Volume
- Centrifugation, density gradient, spermatozoa, C304
- Cerebral cortex, oxygen delivery and consumption (gerbil), C265
- Chemoreceptors: *see* Receptors
- Chloride
  - secretion, tight junction, rectal gland (shark), C388
  - self-exchange, skeletal muscle (toad), C207
- Chloride-36, glucose effects, Ehrlich cells, C326

- Cholesterol, sodium-calcium exchange and, ischemic heart, C288
- Ciliary frequency, palate epithelium (frog), C31
- Cold
  - acclimation, catecholamine sensitivity, brown fat cells, C250
  - trophic response to, guanethidine effects, brown fat, C159
- Collagen, stretch-induced hypertrophy, skeletal muscle, wing (chicken), C333
- Colon, descending, potassium transport by, C81
- Contractile properties: *see* Muscle
- Contractile response
  - depolarization-induced, smooth muscle, calcium-free solution, C36
  - isometric, prolonged exercise, C65
  - magnesium ion induced, smooth muscle, arterial, C25
- Contraction, muscle: *see* Muscle
- Cooling, lysosomes and, effects of adenosine triphosphate, C192
- Coupling ratio, sarcoplasmic reticulum, vascular smooth muscle, C242
- Creatine kinase, release, osmotic changes and, muscle (frog), C396
- Cyanine dye, glucose effects, Ehrlich cells, C326

## D

- Denervation, motor nerve, skeletal muscle, C272
- Depolarization
  - contractile activity, smooth muscle, calcium-free solution, C36
  - potassium-free media, skeletal muscle fibers, C12
- Diamide, neuromuscular transmission and (lobster), C59
- Diffusion, temperature effects, erythrocyte permeability to lipophilic solutes, C74
- Digitonin
  - cytosolic free calcium levels and, proximal tubules, C124
  - proton uptake, secretory granules, pancreatic  $\beta$ -cells, C382
- 1,25-Dihydroxyvitamin D<sub>3</sub>: *see* Vitamin D<sub>3</sub>
- Dinitrophenol, potassium transport and, descending colon, C81
- Diuretic, sodium transport and, tissues and cells, C131
- DNA, stretch-induced hypertrophy, skeletal muscle, wing (chicken), C333
- Dystrophy, muscle contraction (chicken), C19

## E

- Electrical activity, sodium effects, pancreatic  $\beta$ -cells, C296
- Electrodes
  - calcium solutions, C404
- Embryo, contractile property development, fast-twitch muscle (chick), C52
- Enzymes: *see also* specific enzyme
  - release, osmotic changes and, muscle (frog), C398

Epithelial cells  
cultured, thick ascending limbs, kidney, C229  
kidney, hexose transport, C94  
Epithelial tissue  
sodium transport, amiloride effects, C131  
water permeability of, bath osmolality effects (frog), C184  
Epithelium: *see* specific subject and site  
Erythrocytes  
membrane, permeability, temperature effects, C74  
ornithine production, C393  
permeability: *see* Permeability  
Eserine, presynaptic receptors, neuromuscular transmission and, C366  
Excitatory junction potential: *see* Potentials  
Exercise, prolonged, muscle fatigue and, C65  
Exocytosis  
proton uptake  
secretory granules, pancreatic  $\beta$ -cells, C382  
Extracellular space, epithelial tissue, bath osmolality effects, water permeability (frog), C184

**F**

Fat cells: *see* Adipocytes  
Fatty acids, release, brown fat cells, cold acclimation and, C250  
Femoral artery, smooth muscle  
contraction, magnesium ion induced, C25  
Fluorescence, surface, cerebral cortex (gerbil), C265  
Force potential, maximum, tetanized smooth muscle, C283  
Force-velocity relations, smooth muscle, arterial (swine), C102  
Fourier transform analysis, mucociliary frequency, palate epithelium (frog), C31  
Furosemide  
epithelial cell culture, thick ascending limbs, kidney, C229  
glucose effects, Ehrlich cells, C326

**G**

Glucagon, hormone-induced changes, hepatocytes, C172  
Gluconeogenesis, epithelium, kidney (pig), C41  
Glucose  
Ehrlich cells, C326  
metabolism, insulin effects, kidney cells, C121  
proton uptake and, secretory granules, pancreatic  $\beta$ -cells, C382  
D-Glucose, transporter, reconstitution, human placenta, C166  
L-Glutamate, metabolism, LLC-PK<sub>1</sub> renal epithelia (pig), C41  
Glycerol, treatment, osmotic changes, muscle (frog), C398  
Glycogen  
depletion, prolonged exercise, muscle fatigue and, C65  
metabolism, insulin effects, kidney cells, C121  
Glycogenolysis, metabolites of, changes during stimulation, muscle fibers, C218

Glycolysis, insulin action on, intracellular pH effects, skeletal muscle (frog), C87  
Granules, secretory, proton uptake, pancreatic  $\beta$ -cells, C382  
Growth, stretch-induced, wing muscle (chicken), C178  
Guanethidine, trophic response to cold and, brown fat, C159

**H**

Heat  
production  
muscle contraction, dystrophy (chicken), C19  
2-*n*-butyl-methylenedioxyindene effects, muscle (frog), C347  
Hemoglobin, oxygen metabolism, cerebral cortex (gerbil), C265  
Henle's loop, peanut lectin binding, kidney epithelial cells, C117  
Hepatocytes, fluorescence and oxygen consumption, hormone-induced changes, C172  
Hexose, transport, sodium-dependent, kidney cells, C94  
Hormone, action, glycolysis, intracellular pH effects, skeletal muscle (frog), C87  
Hydrogen, exchange, intracellular pH effects, skeletal muscle (frog), C87  
Hydrogen ions, insulin action and, glycolysis, skeletal muscle (frog), C87  
Hyperplasia, trophic response to, brown fat, C159  
Hyperpolarization, potassium-free media, skeletal muscle fibers, C12  
Hypertonic solution, osmotic changes, muscle (frog), C398  
Hypertrophy  
muscle contractile properties, surgical overload, hindlimb, C259  
stretch-induced, skeletal muscle regression (chicken), C333

**I**

Innervation, sympathetic, brown fat and, C159  
Insulin  
action, glycolysis, intracellular pH effects, skeletal muscle (frog), C87  
sodium transport, glucose metabolism and, kidney cells, C121  
Internalization, binding and, particles, macrophage phagocytosis, C339  
Intestinal transport, potassium, descending colon, C81  
Ior, transport, glucose effects, C326  
Ischemia, sarcolemmal enzymes, sodium-calcium exchange and, C288  
Isozymes, myosin, muscle fibers, C373

**J**

Junction  
neuromuscular, magnesium effects, muscle desensitization (frog), C319  
tight, rectal gland (shark), C388

**K**

Kidney  
cells: *see* Kidney cells  
1,25-dihydroxyvitamin D<sub>3</sub> effects, phosphate transport (chick), C312

epithelium, LLC-PK<sub>1</sub>, L-lactate metabolism (pig), C41  
thick ascending limbs, cultured epithelia, C229  
tubules: *see* Kidney tubules  
Kidney cells  
cultured, thick ascending limbs, C229  
epithelial, peanut lectin binding, C117  
hexose transport, sodium-dependent, C94  
insulin effects, sodium transport and glucose metabolism, C121  
phosphate uptake, 1,25-dihydroxyvitamin D<sub>3</sub> effects (chick), C312  
Kidney tubules  
collecting, peanut lectin binding, C117  
cultured cells, thick ascending limbs, C229  
proximal, cytosolic free calcium levels, C124  
Kinase, myosin light chain, vascular smooth muscle (swine), C109

**L**

L-Lactate, metabolism, LLC-PK<sub>1</sub> renal epithelia (pig), C41  
Lanthanum, permeability, tight junction, rectal gland (shark), C388  
Latissimus dorsi  
anterior, stretch-induced hypertrophy (chicken), C333  
posterior, contractile property development, embryo (chick), C52  
Lectin, peanut, binding, epithelial cells, kidney, C117  
Lipophilic solutes, erythrocyte permeability, temperature effects, C74  
Locke's solution, magnesium-free, smooth muscle contraction, arterial, C25  
Lysosomes, cooling effects, adenosine triphosphate and, C192

**M**

Magnesium  
adenosine triphosphate protective action, lysosomes, C192  
desensitization and, muscle (frog), C319  
Magnesium ions, contraction, smooth muscle, arterial, C25  
Membrane: *see also* specific subject and site  
plasma  
calcium uptake, myometrium, C278  
placental microvillous, C166  
potentials: *see* Potentials  
transport  
calcium-free strontium medium (monkey), C353  
strontium medium (monkey), C360  
Membrane vesicles, plasma, calcium uptake, myometrium, C278  
Metabolism: *see* specific subject and site  
Metabolites  
changes, stimulation and, muscle fibers, C218  
compartmentation, striated muscle, C1  
Methylglucoside, sodium-dependent transport, renal cells (chick), C312  
Microcinematography, spermatozoa, C304  
Mitochondria  
calcium level, proximal tubules, C124  
development, cold adaptation, brown fat, C159

- oxygen metabolism, cerebral cortex (gerbil), C265
- Models**
- butyrate effects, ouabain-sensitive respiration, brown adipocytes (hamster), C46
- chloride self-exchange, skeletal muscle (toad), C207
- cross-bridge cycling, smooth muscle, arterial (swine), C102
- oxygen metabolism, cerebral, C265
- smooth muscle behavior, controlled stretches, C146
- Monensin**, proton uptake, secretory granules, pancreatic  $\beta$ -cells, C382
- Motor nerve**, activity-induced enzymatic adaptation and, skeletal muscle, C272
- Mucociliary frequency**, palate epithelium (frog), C31
- Mucociliary transport**, palate epithelium (frog), C31
- Mucus**, transport frequency, palate epithelium (frog), C31
- Muscle**
- contraction
- dystrophic (chicken), C19
- mechanism of, C146
- creatine kinase release, osmotic changes and (frog), C398
- desensitization, magnesium effects (frog), C319
- disease, contraction and (chicken), C19
- fast-twitch, contractile property development, embryo (chick), C52
- fatigue, prolonged exercise, C65
- fiber transformation, intermittent stimulation, C373
- isometric contraction, myosin phosphorylation, C234
- reproductive, behavior during stretch, C146
- stretch-induced growth, wing (chicken), C178
- striated, metabolism, C1
- Muscle, skeletal**
- chloride self-exchange (toad), C207
- contractile properties
- development, embryo (chick), C52
- surgical overload, C259
- contraction, 2-*n*-butyl-methylenedioxyindene effects (frog), C347
- creatine kinase release, osmotic changes and (frog), C398
- enzymatic adaptation, motor nerve and, C272
- fatigue, prolonged exercise, C65
- fibers, hyperpolarization of, potassium-free media, C12
- isometric contraction, dystrophy (chicken), C19
- mechanics and energetics, 2-*n*-butyl-methylenedioxyindene effects (frog), C347
- metabolism, intracellular pH effects (frog), C87
- myosin, light chain, phosphorylation-dephosphorylation, C234
- regression, stretch-induced hypertrophy, wing (chicken), C333
- Muscle, smooth**
- arterial
- contraction, magnesium ion induced, C25
- tonic force maintenance in (swine), C102
- behavior, controlled stretches, C146
- calcium uptake, myometrium, C278
- contractions, force potential, tracheal, C283
- depolarization-induced contractile activity, calcium-free solution, C36
- tracheal, maximum force potential, C283
- vascular
- adenosine triphosphate effects, sarcoplasmic reticulum, C242
- myosin light chain phosphorylation in (swine), C109
- Muscle fibers**
- fast-twitch, oxidative, intermittent stimulation, C373
- metabolite changes, during stimulation, C218
- type IIB to IIA, transformation, intermittent stimulation, C373
- Muscular dystrophy**, stretch-induced growth effects, wing muscle (chicken), C178
- Myofibrils**, prolonged exercise, muscle fatigue and, C65
- Myogenesis**, contractile property development, embryo (chick), C52
- Myometrium**, calcium uptake, plasma membrane, C278
- Myosin**
- electrophoretic patterns, fiber transformation, muscle, C373
- light chain, phosphorylation-dephosphorylation, skeletal muscle, C234
- light chain phosphorylation, calcium ions and, smooth muscle (swine), C109
- N**
- Neostigmine**, presynaptic receptors, neuromuscular transmission and, C366
- Nerves**: see specific nerve and site
- Neuromuscular junction**: see Junction
- Neuromuscular transmission**
- diamide effects (lobster), C59
- presynaptic receptors and, C366
- Nicotinamide adenine dinucleotide, fluorescence, hormone effects, hepatocytes, C172
- Norepinephrine**
- respiration, butyrate effects, brown adipocytes (hamster), C46
- sensitivity, cold acclimation, brown fat cells, C250
- Nucleic acid**, stretch-induced growth, wing muscle (chicken), C178
- Nutrients**, motility and, spermatozoa, C304
- O**
- Oligomycin**, chemoreceptor response and, carotid body, C200
- Ornithine**, production, erythrocytes, C393
- Osmolality**, bath, water permeability, epithelial tissue (frog), C184
- Osmosis**, nonlinear, bath osmolality effects, epithelial tissue (frog), C184
- Osmotic changes**, creatine kinase release, muscle (frog), C398
- Osmotic shock**: see Shock
- Ouabain**
- glucose effects, Ehrlich cells, C326
- potassium transport and, descending colon, C81
- respiration, butyrate effects, brown adipocytes (hamster), C46
- Oxidative capacity**, motor nerve, skeletal muscle, C272
- Oxidative phosphorylation**, chemoreceptor response and, carotid body, C200
- Oxygen**
- carotid body chemoreceptor response to, oligomycin effects, C200
- consumption
- brown fat cells, cold acclimation, C250
- hormone effects, hepatocytes, C172
- delivery and consumption, cerebral cortex (gerbil), C265
- P**
- Pancreatic  $\beta$ -cells**
- electrical activity, sodium effects, C296
- secretory granules of, protein uptake, glucose-induced, C382
- Parathyroid hormone**, phosphate transport and, renal cells (chick), C312
- Particles**, binding and internalization, macrophage phagocytosis, C339
- Percoll**, motility measurement, spermatozoa, C304
- Permeability**
- calcium, ischemic heart, C288
- erythrocyte membrane, lipophilic solutes, temperature effects, C74
- potassium, pancreatic  $\beta$ -cells, C296
- sodium, pancreatic  $\beta$ -cells, C296
- water, bath osmolality effects, epithelial tissue (frog), C184
- pH**
- chemoreceptor response and, carotid body, C200
- intracellular, insulin action and, glycolysis, skeletal muscle (frog), C87
- Phagocytosis**, macrophage, particle binding; and internalization, C339
- Phosphatase**, myosin light chain, vascular smooth muscle (swine), C109
- Phosphate**, uptake, 1,25-dihydroxyvitamin D<sub>3</sub> effects, renal cells (chick), C312
- Phosphocreatine**, muscle, metabolite changes during stimulation, C218
- Phosphodiesterase**, cold acclimation, brown fat cells, C250
- Phospholipids**, sodium-calcium exchange and, ischemic heart, C288
- Phosphorous nuclear magnetic resonance spectroscopy**: see Spectroscopy
- Pinocytosis**, binding and internalization, particles, C339
- Placenta**, microvillus plasma membranes, D-glucose transport reconstitution, C166
- Plasma**, membrane: see Membrane
- Polypeptides**, vasoactive intestinal, fluorescence and oxygen consumption changes, hepatocytes, C172
- Posttetanic potentiation**, myosin phosphorylation, skeletal muscle, C234
- Potassium**
- exchange, skeletal muscle (toad), C207
- permeability: see Permeability
- smooth muscle contracture, arterial, C25
- transport
- amiloride effects, tissues and cells, C131
- descending colon, C81

- Potassium-chloride, cotransport, skeletal muscle (toad), C207
- Potassium-free media, hyperpolarization, skeletal muscle fibers, C12
- Potassium-*p*-nitrophenylphosphatase, sodium-calcium exchange and, ischemic heart, C288
- Potentials
- end-plate, presynaptic receptors and, C366
  - excitatory junction, diamide effects (lobster), C59
- membrane
- calcium-free strontium transport (monkey), C353
  - glucose effects, Ehrlich cells, C326
  - strontium-induced spontaneous sweating (monkey), C360
  - transepithelial, strontium-induced spontaneous sweating (monkey), C360
- Protein
- membrane, placental microvillous, C166
  - stretch-induced hypertrophy, skeletal muscle, wing (chicken), C333
  - transport, osmotic changes and, muscle (frog), C398
- Proteoliposomes, reconstitution of D-glucose transporter, human placenta, C166
- Protons, uptake, glucose-induced, pancreatic  $\beta$ -cells, C382
- Pump
- calcium, plasma membrane, myometrium, C278
  - sodium, hyperpolarization, potassium-free media, skeletal muscle, C12
  - sodium-potassium, electrical activity and, pancreatic  $\beta$ -cells, C296
  - sodium-potassium membrane, respiration, brown adipocytes (hamster), C46
- Pyruvate carboxylase, cold acclimation, brown fat cells, C250

## R

- Receptors
- chemoreceptors, carotid body, oxygen and carbon dioxide responses, C200
  - presynaptic, neuromuscular transmission and, C366
- Rectal gland, chloride secretion, tight junction (shark), C388
- Red blood cells: *see* Erythrocytes
- Respiration, ouabain-sensitive, butyrate effects, brown adipocytes (hamster), C46
- RNA, stretch-induced hypertrophy, skeletal muscle, wing (chicken), C333

## S

- Sarcolemmal enzymes, sodium-calcium

- exchange and, ischemic heart, C288
- Sarcoplasmic reticulum
- adenosine triphosphate effects, vascular smooth muscle, C242
  - prolonged exercise, muscle fatigue and, C65
- Saturation transfer method, metabolism, striated muscle, C1
- Shock, osmotic, creatine kinase release and, muscle (frog), C398
- Skin, bath osmolality effects, water permeability (frog), C184
- Sodium
- absorption, descending colon, C81
  - electrical activity and, pancreatic  $\beta$ -cells, C296
  - metabolism, intracellular pH effects, skeletal muscle (frog), C87
  - permeability: *see* Permeability transport
  - amiloride effects, tissues and cells, C131
  - insulin effects, kidney cells, C121
- Sodium-calcium exchange, sarcolemmal enzymes and, ischemic heart, C288
- Sodium free-energy gradient, intracellular pH effects, skeletal muscle (frog), C87
- Sodium-hydrogen exchange, amiloride effects, tissues and cells, C131
- Sodium ions, hexose transport, kidney cells, C94
- Sodium-potassium-ATPase
- sodium-calcium exchange and, ischemic heart, C288
  - thermogenesis, brown adipocytes (hamster), C46
- Sodium-potassium membrane pump: *see* Pump
- Sodium pump: *see* Pump
- Soleus muscle, hyperpolarization, potassium-free media, C12
- Spectroscopy
- phosphorous nuclear magnetic resonance, striated muscle, C1
  - photon correlation, spermatozoa, C304
- Spin-transfer method, metabolism, striated muscle, C1
- Stimulation
- electrical, skeletal muscle, C272
  - intermittent, fiber transformation, muscle, C373
  - metabolite changes during, muscle fibers, C218
- Stress, development, vascular smooth muscle (swine), C109
- Stroboscopy, spermatozoa, C304
- Strontium
- calcium-free medium, spontaneous sweat secretion in (monkey), C353
  - smooth muscle contraction, arterial, C25
  - spontaneous sweating, transepithelial potential during (monkey), C360
- Surgical overload, contractile properties

- during, hindlimb muscles, C259
- Sweat gland
- spontaneous secretion, calcium-free strontium medium (monkey), C353
  - transepithelial potential, strontium-induced spontaneous sweating (monkey), C360
- Sympathectomy, chemical, brown fat, C159

## T

- Temperature
- changes, erythrocyte permeability to lipophilic solutes, C74
  - motility and, spermatozoa, C304
- Thermogenesis
- nonshivering
  - butyrate effects, brown adipocytes (hamster), C46
  - catecholamine sensitivity, brown fat cells, C250
- Thiol, oxidizing, neuromuscular transmission and (lobster), C59
- Thioreactive agent, neuromuscular transmission and (lobster), C59
- Tissue: *see also* Adipose tissue
- sodium transport, amiloride effects, C131
- Tonic force, reduced shortening velocity, smooth muscle, arterial (swine), C102
- Trachea, maximal force potential, smooth muscle, C283
- Transmitter, release, diamide effects (lobster), C59
- Transport: *see* specific subject and site
- Triton, adenosine triphosphate protective action, lysosomes, C192
- d*-Tubocurarine, presynaptic receptors, neuromuscular transmission and, C366
- Tumor promoter, sodium-dependent hexose transport, kidney cells, C94

## U

- Urea, lactate metabolism, renal epithelia (pig), C41

## V

- Vasopressin, NADH fluorescence, oxygen consumption, hepatocytes, C172
- Vitamin D<sub>3</sub>, 1,25-dihydroxy, phosphate uptake and, renal cells (chick), C312
- Volume
- cell
  - bath osmolality effects (frog), C184
  - glucose effects, C326

## W

- Water, permeability: *see* Permeability

## Z

- Zymosan, binding and internalization, phagocytosis, C339
